

CONCENTRIC MIDDLE EAST & NORTH AFRICA TraCR REPORT

TRAVEL CYBERSECURITY RISK

Risk Level: High

Updated: October 2022

REGION RISKS

Due to a lack of adequate cyber protections, a sharp rise in malware attacks, and a rapid digital transformation of the region's economies, countries in the Middle East and North Africa present a high risk of cybercrime for travelers. This risk is exacerbated by the COVID-19 pandemic, which has led to a loss of jobs and low economic growth, opening up opportunities for cyber criminals.

- Targeted ransomware attacks are often launched against corporations.
- State-sponsored entities steal travel information and mobile data.
- Government-led intelligence agencies' surveillance of social media platforms has resulted in the arrest of foreign individuals.
- Hackers masquerading as a trusted acquaintance conduct phishing attacks.
- Oman, Kuwait, Bahrain, Egypt, and Qatar have experienced a sharp rise in malware attacks since early 2021.
- Terrorist organizations and non-state actors supported by Iran are increasing their cyber capabilities
- The Iranian government engages in website defacement, spear phishing, distributed denial-of-service attacks, theft of personal information, and attacks intended to cause physical consequences. Tehran has jailed individuals for posting online content it deemed subversive.

HOW CAN YOU PREVENT BECOMING A VICTIM OF A CYBER CRIME WHILE TRAVELING?

DO...

- Contact Concentric to help conduct risk assessment to determine vulnerabilities
- Enroll in a PII removal service, such as [Eclipse*](#)
- Consider buying burner cellular devices

DO NOT...

- Leave Bluetooth and Wi-Fi enabled
- Advertise your travel on social media
- Travel with personal devices
- Connect to public Wi-Fi at hotels, airports and cafes using personal devices

HOW CAN YOU DETECT IF YOU HAVE BECOME A VICTIM OF A CYBER CRIME WHILE TRAVELING?

- Install an antivirus application
- Perform manual scans of suspected malicious files/downloads
- Enable login notifications
- Add a fraud alert to your credit card and credit report

WHAT SHOULD YOU DO IF YOU HAVE BECOME A VICTIM OF A CYBER CRIME WHILE TRAVELING?

- 1 Containment. Delete the virus source, disconnect from Wi-Fi, and change all passwords.
- 2 Remediation. Wipe devices and inform stakeholders, by phone, an incident has occurred.
- 3 Recovery. Restore data from backups if your device was wiped or stolen.
- 4 Assessment. Determine what can be done in the future to prevent further incidents.

CONTACT CONCENTRIC 24/7 IF YOU NEED ANY URGENT ASSISTANCE OR HAVE ANY QUESTIONS.
